Summary

Computer Science Engineering student with a strong interest in Machine Learning, Generative AI, and Artificial Intelligence. Proficient in Python, with a foundation in Data Structures and Algorithms and knowledge of web development. Experienced in developing projects involving machine learning and NLP, with an interest in building intelligent, practical, and user-centric AI applications. Eager to explore emerging AI technologies and contribute to innovative solutions that address real-world challenges.

Career Objective

Motivated Computer Science Engineering student seeking opportunities to apply my skills in Python, Machine Learning, Generative AI, and software development to solve real-world problems. Aspiring to contribute to innovative AI-driven projects, gain practical industry experience, and continuously expand my technical expertise while growing as an AI/ML Engineer.

Projects

CineMatch | https://yuvisoni-cinematch-app-ppfahe.streamlit.app/

Hybrid Movie Recommendation System built using Python, Streamlit, and Scikit-learn, combining Content-Based Filtering, Collaborative Filtering, and Matrix Factorization to deliver personalized movie recommendations through an interactive web application.

TrustRAG | https://github.com/yuvisoni/TrustRAG

Trust-Aware Retrieval-Augmented Generation system for reliable, evidence-grounded AI responses.

House-Price-Prediction | https://github.com/yuvisoni/House-Price-Prediction

Machine Learning-based house price prediction web application built using Python, Scikit-learn, and Streamlit.

Smart-Summarizer | https://github.com/yuvisoni/smart-summarizer

Python-based NLP text summarization tool using TF-IDF and TextRank algorithms to extract key sentences from lengthy documents.

DUNGEON ZERO | https://github.com/yuvisoni/dungeon-zero.git

Developed a high-performance terminal-based dungeon crawler using Nim 2.4.0, featuring procedural dungeon generation, BFS-based enemy pathfinding, raycasted Field of View, fog of war, and turn-based combat. Implemented multi-floor progression, character leveling, inventory management, and a deterministic AI simulation benchmark, with 11 automated test suites validating core game mechanics.

Skills

- Python
- Java
- CSS
- Project Management
- Machine Learning
- Data Structures
- Generative AI
- Communication
- Javascript
- HTML
- Leadership

Educations

College/school	University/Board	Degree/Standard	Passing Date
Dayanada Sagar College Of Engineering	Visvesvaraya Technological University	Bachelor of Engineering	Present

Professional Certificates

Generative AI Foundations Certificate (https://lnkd.in/p/dGBsSimb)
Ultimate Web Development Course (https://lnkd.in/p/drn3AtA8)

I hereby declare that all above information is in correct with fact or truth up to my knowledge and I bear the responsibilities for the correctness of the above mentioned particulars.
